Business Card Designer Plus is developed for users who want to easily create, design and print business cards. Once you initiate the application with the clean and intuitive interface, you can start a project from scratch or use the Design wizard. The Design wizard lets you select your paper stock, whether you want to create a standard-size business card or customize your own. You can select from several options in the business card and CDR business label categories, include a specific stock type (US, metric or both), reverse the orientation and set the tool to remember the selection for future references. Furthermore, you can set the paper type, element size, region type and page layout. But you can also select templates from various categories (e.g. borders, corporate, geometric) and insert a background image. So, you can use basic elements, such as text, pictures, lines, boxes, ellipses, diamonds, stars, arrows, custom objects, and others. But you can also use the "Undo" and "Redo" buttons, configure the alignment, zoom in and out, open an object library, and more. Once you are satisfied with the results, you can save them as a Business Card Designer Plus project for further editing, as template or as an image (PNG, BMP, JPG, TIF, EMF). The program uses a low-to-moderate amount of system resources, includes a well-written help file and didn't freeze, crash or pop up errors during our tests. We strongly recommend Business Card Designer Plus to all users. Business Card Designer Plus is developed for users who want to easily create, design and print business cards.
